

## **Taridium LLC and Avangard Solutions, Inc. Team Up to Deliver a turn-key Enterprise VoIP Solution**

*Customers gain Taridium's powerful IPBX technology, now fortified with Avangard's state of the art VoIP Billing capabilities.*

**New York, NY, August 6, 2009** – Taridium LLC, one of leaders in open standards enterprise and provider VoIP solutions, and Avangard Solutions, Inc, a leading provider of VoIP billing solutions, have announced a partnership that will enable them to provide one of the most advanced Enterprise VoIP Solutions on the market.

Under the terms of the partnership, Avangard Solutions will integrate its AVAVoIP Billing System with Taridium's enterprise class VoIP PBX product, which will result in a fully integrated, robust, end-to-end Enterprise VoIP solution.

Taridium's ipbx is a fully featured enterprise class VoIP PBX solution that supports up to 15,000 users. The product offers high performance solid state PBX hardware, award winning PBX management software, wide choice of phones, software installation & phone provisioning. In addition to all the enterprise class features expected on a next-generation phone system, Taridium offers a number of optional services and modules.

AVAVoIP is a state of the art billing and routes provisioning solution which enables service providers to gain flexibility in all areas of the billing process: pricing, rating, invoicing, taxation, settlement, balance management, reporting, revenue assurance and accounting. Add on components such as agents commissioning and taxation differentiate the product from the competition. Open Web Services APIs allow easy integration into existing systems or portals.

“We are very pleased to be able to build a relationship with a company like Avangard Solutions,” said Dominique Kull, Taridium's CTO. “This partnership will enable us to provide together one of the most competitive enterprise VoIP solutions on the market.”

“AVAVoIP is the ideal complement to Taridium's ipbx solutions since the ever increasing regulatory demands make precise call accounting indispensable for our large corporate customers,” he continued “The AVAVoIP platform provides best in class billing features and performance and offers an indispensable reporting functionality which allows customers to optimize their voice traffic and to track their costs.”

### **About Avangard Solutions, Inc.**

Avangard Solutions is a leading provider of a wide range of software products including rating, billing, switching, and customer care applications. The company also provides several value added services including international VoIP termination, hosted VoIP services, support and maintenance services, and development services.
